

## On You Mark, Get Set, Go: Don't Hesitate, RootsTech 2021 Is Here Officially!!!

It has been said that a picture can work a thousand words. Here are next images that will tell the story for me. My son in-law now has 16,000+ relatives that he is linked to at RootsTech 2021 Connect. Prerequisite for such magic is that you sign in with you FamilySearch account after registering at [www.rootstech.org](http://www.rootstech.org). Then the magic of technology takes over with choices of who are related to, plus a world map where they with opportunities to chat/text message with you.

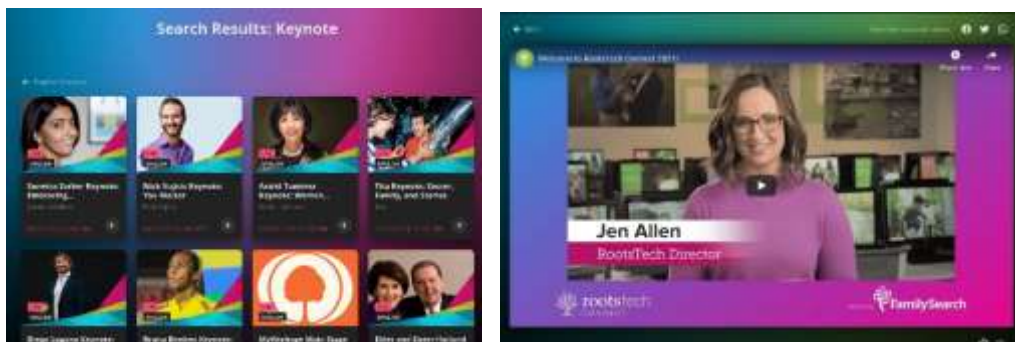

You don't want to miss the virtual exhibit hall for the latest and very best technology solutions for genealogists at all levels of development. Note, most vendors are in English.

If you aren't sure of yourself, there're are many tutorials to use.

To help you remember the conference schedule, you can create a playlist for everything you want to see. Don't forget the **Main Stage** for all the keynote speakers and there are over 1,500 sessions that you can partake of for the next 11 months with all of them at the 30-minute maker for convenient scheduling.

To help you stay on task, consider creating your own online playlist for not only during the conference but also for then next 11 months.

### Closing Comments

Don't hesitate to register for RootsTech and upload your latest Family Tree to FamilySearch.org.

# My Playlist

Everything you want to watch in one place.

Add sessions and series to your playlist to see them here.
